

GREEN OPPORTUNITIES IN INDONESIA:

Results and Challenges in Promoting Renewable Energy

The Danish Energy Agency, DI Energy and the Ministry of Foreign Affairs of Denmark are pleased to be hosting a morning event to take stock of ten years of environment support and discuss future opportunities for Danish engagement in Indonesia.

Indonesia is the largest economy in South East Asia, an emerging middle-income country with annual growth of 5-6%. Since 2000, the GDP has increased fourfold and millions of people have been lifted out of poverty. Access to reliable and sustainable energy is critical to Indonesia's ambitions for continued growth as well as reduced greenhouse gas emissions.

This is why renewable energy is the focus of this event on engagement opportunities as Danish grant assistance is replaced by modalities based on comprehensive strategic sector cooperation and trade.

Films and short presentations give the big picture of results and challenges in green transition. An interactive format ensures involvement of participants, including through video link with partners in Indonesia. The event takes place on **26 October 2018 at the Danish Energy Agency, 44 Amaliegade, 1256 Copenhagen K**. Places are allocated on a first-come, first-served basis on <https://billetto.dk/en/e/green-opportunities-in-indonesia-results-and-challenges-in-promoting-renewable-energy-tickets-307811>

TIME	PROGRAMME
08.00-08.30	REGISTRATION AND COFFEE
08.30-08.45	WELCOME Martin Hansen, Deputy Director General, <i>Danish Energy Agency</i> , and Rasmus Abildgaard Kristensen, <i>Ambassador of Denmark to Indonesia</i> , welcome participants and outline the purpose of the seminar.
08.45-09.45	BIG PICTURE OF GREEN OPPORTUNITIES IN INDONESIA Kurt Mørck Jensen, former Head of Development, <i>Embassy of Denmark Jakarta</i> , sets the stage with an overview of Danish engagement results and opportunities for green transition. A Panel discussion on green challenges and opportunities engages National Programme Adviser Per Rasmussen, ESP3, Thomas Algreen Nielsen, CEO, Johs. Gram-Hanssen, Executive Director Nur Hidayeti, <i>WALHI - Indonesian Forum for the Environment</i> , and Troels Ranis, Director, <i>DI Energy</i> in dialogue with participants.
09.45-10.45	POTENTIAL FOR FUTURE ENGAGEMENT IN RENEWABLE ENERGY Andreas Karlsen, Country Coordinator for Indonesia, <i>Danish Energy Agency</i> , presents the sector context for challenges and opportunities in the case of renewable energy. Perspectives from Indonesia by Energy Counsellor Søren Mensal Kristensen, <i>Embassy of Denmark</i> and Saleh Abdurrahman, Secretary General, <i>National Energy Council of Indonesia</i> (tbc). Head of Global Public Affairs Kresten Ørnbjerg, <i>Vestas Wind Systems</i> shares experience on potential and challenges on the Indonesian market. Participants join the panel in discussing what it takes to succeed.
10.45-11.00	CONCLUSION Moderator Verner Kristiansen summarises the outcome of the seminar and concludes the event with a three-minute film on young Indonesians and their perception of the future of energy and the need for green transition.
